CC&M Certified as a Microsoft Solutions Partner, Ranking Among the Top 5% of Providers

*Leading Managed Technology Services
Provider Demonstrates
Highest Level of Expertise to Elevate
Customer Success*

GREENWOOD & GREENVILLE SOUTH CAROLINA – January 28, 2025 - CC&M, a leading managed technology services provider (MTSP), has officially earned the coveted designation of Microsoft Solutions Partner, a certification placing the company in the top 5% of all Microsoft providers worldwide. Over the years, CC&M has grown to popularity by consistently delivering customer experience and focusing on increasing the efficiency of the organizations it supports. One of the key ingredients to their success has been their superior technical expertise, which is clearly demonstrated by this recent achievement. This accolade underscores CC&M's exceptional expertise, experience, and commitment to helping customers leverage Microsoft technologies to their fullest potential.

This prestigious certification is not easily attained. There are various criteria including performance (revenue and usage growth), customer success (deployments and certifications), and skilled certifications (number of certified professionals on staff), in addition to various other factors. However, the most important factor is a proven track record of high customer satisfaction rates. Achieving this certification required CC&M to meet rigorous benchmarks, showcasing advanced knowledge and capabilities in cloud services, data management, and

infrastructure solutions. Microsoft awards the designation to providers that demonstrate this significant level of expertise, but also monitors them to ensure they consistently keep up to date with the latest technological developments in order to retain their status.

“Our designation as a Microsoft Solutions Partner reflects years of dedication to providing our customers with the best solutions,” said Rocky Dunkman, Owner/CEO at CC&M. “It means we’re not just using Microsoft tools; we’re maximizing their potential to help businesses succeed. Whether it’s transitioning to the cloud with Microsoft Azure or creating more efficient systems with Office 365, we ensure our customers are getting the best value and the most effective solutions.”

As a Solutions Partner, CC&M brings Azure Certified Architecture expertise to its customers, enabling them to adopt cloud technologies with confidence. By leveraging Azure’s scalability, reliability, and security, businesses can modernize their IT infrastructure, reduce costs, and position themselves for future growth.

“Cloud technology is no longer a luxury; it’s a necessity for businesses that want to stay competitive,” Dunkman continued. “Our certification gives our customers peace of mind knowing they’re working with a partner who truly understands how to make Microsoft’s tools work for them.”

Businesses considering a move to the cloud or looking to improve their use of Microsoft tools can rely on CC&M for guidance. The company’s

Microsoft Solutions Partner designation signifies not only expertise but also a proven ability to deliver results that align with customers’ strategic goals.

ABOUT Computer Consultants & Merchants Inc (CC&M)

In 1992, Computer Consultants & Merchants was founded to bring technology services and equipment to businesses in the Orlando, Florida area. In 2001 they expanded their footprint by adding offices in Greenwood and later Greenville covering the Upstate of South Carolina. CC&M streamlined the way companies do business, and the Company became successful for its expertise and service. Providing consulting, business acumen, and of course maintenance services that have always included parts and labor for clients.

Computer Consultants has evolved to meet the changing needs of businesses, providing clients with exemplary technology consultation, Business phone Systems, Access Control with Video surveillance, Cyber Security, Managed Print, integration and Managed services are still the core of everything we provide.

Thirty years later CC&M is still doing what it does best, providing its clients with advanced technology solutions and stellar service!
